# Vent-Free Gas Fireplace Insert

## CONVERT YOUR OLD WOOD BURNER TO AN EFFICIENT VENT-FREE APPLIANCE!

The Vanguard Vent-Free Gas Fireplace Insert simply slides into an existing masonry fireplace or recesses into a frame opening. Refer to owner's installation manual for zero-clearance application. (Minimum Fireplace Opening 26" H x 34 3/4" W x 15 3/4" D)

A Vanguard Vent-Free Gas Fireplace Insert is an ideal way to turn an unsightly, sooted or damaged wood burning masonry fireplace into a beautiful, 99.9% heating efficient vent-free appliance. Simply slide into an existing fireplace or recess into a wall, hook to gas, and presto! – you will have a beautiful, efficient gas fireplace. The vent-free design requires no chimney and offers safe, reliable heat for pennies an hour.

The Vanguard Zero-Clearance Fireplace Insert features a beautiful charcoal textured paint finish, heat circulating louvers and concealed remote-ready controls. The fiber ceramic logs have realistic bark, detailed split and charred areas. The revolutionary one-piece multi-log design ensures proper placement.

There are several accessories available to further enhance the performance or appearance of your Vanguard Vent-Free Gas Insert. The GS38 and GS43 surrounds feature polished brass trim, while the GB38 and GB43 surrounds feature black trim. All surrounds conceal the installation opening around the fireplace. There are four remote controls available: an on/off wall switch, wall thermostat, hand-held on/off or thermostat remote control.
